# Anewgo Websites - Release Notes - April 25, 2024

Enhanced Design Capabilities:

- Tech Template Release: We've completed the design for the new Tech template for AWS.
- Elegant Theme Update: The Elegant theme now boasts a new Subpage section.
- Color Theme Expansion: Expanded color theme options are now available.

- 404 Page Customization: You can now customize your website's 404 error page.

Improved Content Management:

- Single Featured Blog Article: You can now have only one featured article on a blog page.
- Global/Shared Sections: We've implemented Global/Shared Sections, allowing you to create content that can be reused across multiple pages.

Anewgo Homes / Website Pages

- Custom Page Assignment: Global/Shared Sections can be assigned to any custom page.
- Global Page Integration: Global Sections can be integrated into Global Pages.

## Streamlined Integrations and Data Handling:

- Hubspot User in Webhook: Forms webhook data now includes the Hubspot User.
- Form Submission Tracking: We now collect information on which page custom forms are submitted.
- Zen-Service Update: VESMIR_BASE_URL has been added to the zen-service environment.
- Mapbox Integration: Hemi-rust now includes an environment variable for Mapbox.
- XML Feed Enhancement: XML feeds now separate plans based on the number of floors.

Enhanced Community Features:

- "Coming Soon" Phase: allows you to input different fields and test, including "Alternate Price Text"

- Advanced Feature: Community Customize Page allows you to create groups and configure the global display for each group. Ex: Create a different layout with different CTAs for Coming Soon communities

Bug Fixes

Favorites Management:

- Duplicate Favorites Fix: We've resolved an issue where adding a favorite while signed out could lead to duplication.
- Image Not Found Error Fix: Refavoriting a favorite from the design page no longer causes an "Image not Found" error.

Community Information:

- Inactive Community Pages: Inactive communities no longer have active pages.

Display and Formatting:

- Consistent Blog Publish Dates: Blog publish dates are now displayed correctly and consistently.
- Site Plan Legend Accuracy: Site Plan legends for websites now accurately show excluded lots.
- Brochure PDF Elevations: We've improved the handling of elevations with multiple optional base images on Brochure PDFs.
- Text Image Section Height Limit: The height of the section Text Image Section is now appropriately limited.
- Pricing Issue: Garman: An issue was fixed where interior option package pricing incorrectly merged community and plan prices.
- Plan Community Dropdown: The "No Community" option has been removed from the community dropdown for a plan.

Pricing and Data Accuracy:

- CallRail Phone Swapping: CallRail dynamic phone number swapping is now working on community pages.

Other Fixes:

- Mobile Web Vitals Improvement: Core Web Vitals Assessment has been improved on Mobile.
- Customized Favorite Images: Customized exterior images are now used for plans favorited by users.
