

Anewgo Websites - Release Notes - October 22, 2025

✨ New Features

This release introduces powerful new tools to help you manage content, engage users, and expand your community reach:

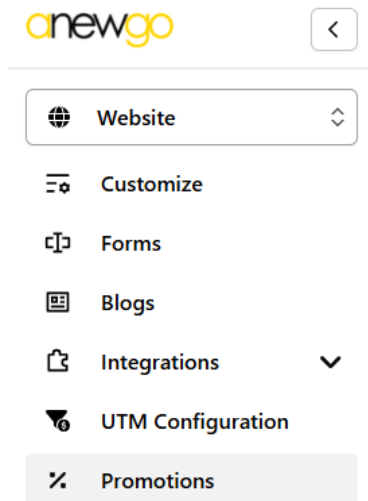

- **Mortgage Calculator:** Easily implement a **Mortgage Calculator** directly on your website.

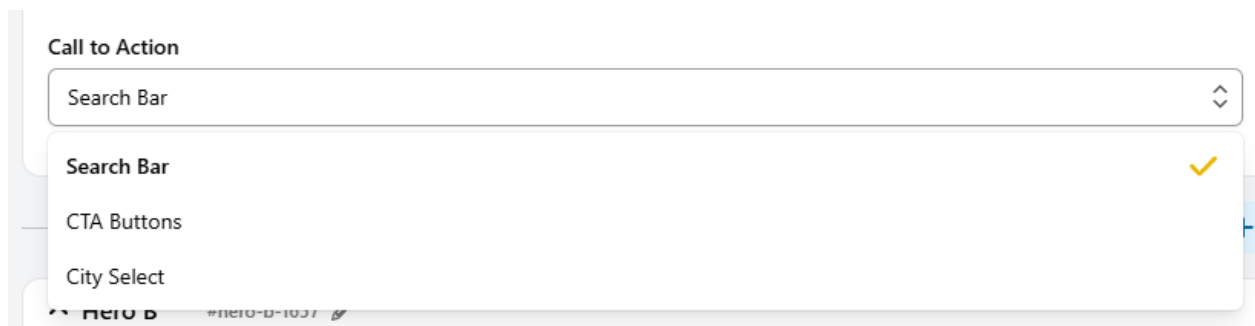

- **HubSpot Integration:** Introduced **HubSpot Form sections** for streamlined integration of Hubspot Forms.
- **New CTAs Section:** A new, dedicated section for **Call-to-Actions (CTAs)** has been created which allows you to add buttons anywhere on your custom page.
- **Video in Hero Sections:** You can now add **YouTube/Vimeo videos** to both the **Hero A** and **Hero B** page sections.

- **Promotions Management (Content Dashboard):**

- Added **Promotions to the Content dashboard** so they can be reused across XML Integrations, Websites, and MHA 3.0.
- Ability to **attach Multiple Promotions to a Community** for display on the Website Platform and Realtor Listings.

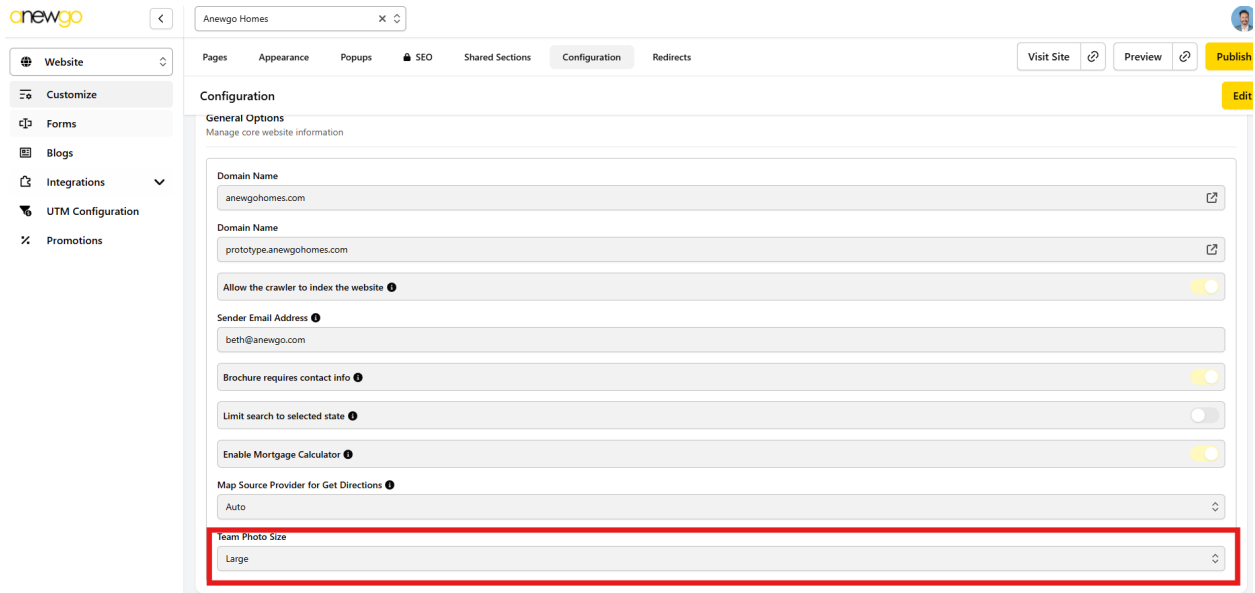

- **Scattered Lots:** Now supporting **Scattered Lots** functionality. Please talk to your Account Manager for setup.
- **Custom Ribbon Colors:** Ability to select a **custom color per ribbon** for lots.
- **City Search Dropdown:** Ability for the **Search Bar to be a drop down** of only cities that have communities in Hero A.

Improvements

We've refined several areas to give you more control over your website's design and content:

- **Enhanced Filtering:**
 - Added the ability to filter based on **school district**, and **county**.
 - Filter communities by “**model available**” using a dedicated filter option.
 - When **State Filtering is turned on**, we now only display filtered state counties in the selection modal.
- **Hero Section Customization (Hero A):**
 - Ability to choose **unique Mobile Content** for Hero A.
 - Added a toggle to **show/remove overlay/tint** from Hero A.
 - Added a toggle to **show/remove a text background** from Hero A.
 - Ability to load **mobile-specific images** for Hero A.
- **Content and Display Flexibility:**
 - **Plan Description Page:** Support **community and elevation-specific descriptions**.
 - **Lots:** Added the ability to add **ribbons for lots**.
 - **Forms:** Added a **rich text editor and checkbox** to forms.
 - **Team Photos:** Create **size options for team photos**.

The screenshot shows the Anewgo Homes website configuration interface. The left sidebar contains navigation links: Website, Customize, Forms, Blogs, Integrations, UTM Configuration, and Promotions. The main content area is titled 'Configuration' and includes a 'General Options' section for managing core website information. The 'Team Photo Size' dropdown is highlighted with a red box, showing the 'Large' option selected.

- **Navigation and User Experience:**
 - **Elegant Theme:** Now features a **button to scroll to the top of the page** on desktop.
 - **Tech and Bold Themes:** Added a toggle for **background gradient effect**.
 - **Plan Detail Page:** **Floor plan options should always be visible**.
 - **Interactive Floorplan:** Added a **Preview button** to make viewing changes easier on smaller screens.
 - **Gallery Display:** If only **one image is in a gallery, the scroller is no longer shown**.
 - **Elegant Theme Image Link Column:** Improved usability to be usable as **3 columns in landscape mode**.
 - **Mobile Floor Plan Module:** Increased the **image height** for better visibility.
- **Administrative and Technical:**
 - **Google Directions:** Allow the builder to choose between **Apple or Google for Get Directions** links.
 - **Global Pages:** Added "save favorite" as a sub-action for other global pages.
 - **Team Member Bio:** If the team member bio is not filled out, the **image is no longer clickable**.
 - **Indexing:** Improved indexing to prevent Google from choosing different canonical names for pages with duplicate content.
 - **Available Homes:** Increased accuracy showing **available home addresses**.
 - **Design Components:** Additional enhancements to navigation.

Fixes

We've resolved several issues to ensure a smoother, more reliable website experience:

- **Mobile/Small Screen Fixes:**
 - Fixed an issue where **'Start Designing'** was removed from the top of the screen on smaller screens.
 - Fixed an issue where the **"SELECT HOME"** button was sometimes cut off in mobile portrait orientation.
 - Fixed an issue where **Testimonial Images** were not showing properly on smaller screens.
 - Improved **UI for Mobile BOYL** to make applying filters/selecting county easier.
- **Page and Content Display:**
 - Fixed an issue where the **Media Tab Title** section does not do anything.
 - Fixed an issue where the **Blog Page Title** was not renaming correctly.
 - Fixed an issue where **some plans in Collections** were showing a home type of **"Other"** on the community page.
 - Fixed an issue where **When switching Elevations**, the Thumbnail image was not properly updating.
 - Fixed an issue where **some PNG floorplan images** were jumpy when using Zoom and Drag options.
- **Theme Specific Fixes (Elegant Theme):**
 - Fixed an issue where the **Model Home Section** was using a different font for the Title.
 - Fixed an issue where the **Elegant theme** was not displaying driving directions.
- **Performance and Integration:**
 - Fixed **spacing issues** when using Microsoft Edge.
 - Fixed an issue where the **XML feed** was not matching/pulling the correct **square footage** for the base plan when there was another plan with two stories.
 - **City Search** on the QMI list now zooms in on the map.
- **User Flow Fixes:**
 - Fixed an issue where selecting a community on a plan page was forcing the user to **jump to the top of the page**.
 - Improvements made to clarify **selected schemes on the Summary page**.
