

Anewgo Platform Release Notes

Sep 29, 2026

✨ New Features & Enhancements

- **Post-Submission Account Creation Prompts:** You can now encourage site visitors to create an account immediately after they submit a form or request a brochure. If they choose to sign up, their contact details automatically pre-fill into the registration form for a fast, frictionless sign-up experience. You can enable or disable this feature anytime in your Console settings.
- **Customizable Promotion Banners:** Customize top promotion banner button colors to align with your brand guidelines and meet web accessibility standards.
- **Enhanced Lead & Campaign Tracking:** Set custom redirect URLs for registration pages and brochure downloads while seamlessly preserving your UTM campaign parameters.
- **Custom Floor Labeling:** Easily customize floor level labels (e.g., Main Level, Second Floor, Basement) across your interactive plans.
- **New "Villa" Home Type:** "Villa" is now supported as an official home type across your database and external XML feeds.
- **Custom Header Logo Links:** Marketing App header logos can now be configured to point directly to a custom destination URL.

🔧 Usability & Performance Improvements

- **Websites & Interactive Apps:**
 - **Community Pricing:** Updated community plan cards to accurately reflect local community pricing.
 - **Site Map Navigation:** Returning to interactive site maps from Lot Management now preserves your previously selected map or sub-map filters.
 - **Page Navigation:** Navigating across website pages now consistently loads at the top of the newly selected page.
 - **Sales Center Media Player:** Improved video loading, controls, and thumbnail displays in the Sales Center app.
- **Brochure Email Sender Address:** Fixed sender address routing so clients with custom Marketing App domains reliably send brochures using their custom "From" email address.
