

# Platform Release Notes – August & September 2026

## All Builders & Core Platform

*Features, enhancements, and fixes applying across all platform modules.*

- **Bulk Data Updates via CSV/Excel:** Admins can now bulk-update community-specific Plan and Elevation pricing using CSV or Excel uploads. *External IDs and account permissions must be configured first, and brief training is required.*
- **Phone Lead Capture Toggle:** Added a "Require Phone Number" setting in Brochure Settings, giving builders the option to enforce phone lead capture during brochure downloads.
- **External Image Link Support:** Added support for external image URLs in media management, allowing image linking without requiring direct file uploads.
- **Flexible Garage Ranges:** Admins can now define garage ranges starting from zero (e.g., 0–1 or 0–2 garages) without the field auto-disabling.
- **SEO & Social Sharing Metadata:** Image alt text set in the Media Library is now included in social sharing metadata (`og:image:alt`), and social share image dimensions have been corrected.
- **Password Reset Expiration Notes:** Password reset pages now clearly display link expiration times and provide a streamlined "Request New Link" button when expired.
- **Analytics Fixes:** Corrected lead count calculation rules on Popular Lots reports to keep analytics properly scoped.
- **Scattered Lots Siteplan Boundary Editing:** Prevented boundary shapes from being moved while the siteplan map is locked, and added hover tooltips to boundary edit controls.
- **Elevation Pricing Messaging:** Fixed incorrect "Contact Us For Pricing" messaging displaying on \$0-priced elevations.

## Websites Only (CMS & Front-End)

*Updates specifically affecting Website Pro/Core admin controls, website layouts, and front-end buyer experiences.*

### Content Dashboard & CMS

- **Floor Plan Module Builder Access:** Officially enabled direct builder management for floor plans in the Content Dashboard! Upgraded the entire workflow with sticky

navigation, image undo capabilities, fixed card sizing, live counters, faster search, and builder-appropriate unassigned-plan defaults.

- **Elevation Info Tab Enhancements:** Improved the Elevation Info tab featuring a larger preview area and more direct plan-spec range entry.
- **Original SVG Floorplan Downloads:** Restored original SVG downloads from the Floor Plan Preview alongside existing JPG and PNG options.
- **Customized Sales Status Selection:** Improved Sales Status selection to display builder-configured terms and a full, unclipped dropdown list.
- **Flexible Community Selection in Forms:** Added an optional, customizable "Not Sure" option to community selection dropdowns in the Form Builder.
- **Publishing Dependency Warnings:** Dependency warnings now surface earlier in the publishing workflow to catch potential conflicts before going live.
- **Search Engine Plain-Text Descriptions:** Enforced plain text on site descriptions to improve search engine indexing and eliminate formatting issues.
- **CTA Button Configuration:** Fixed issues when changing Call-to-Action buttons from section links to pop-up modals.

## Front-End & Buyer Experience

- **Smooth Page Navigation:** Prevented pages from automatically jumping to the top when triggering pop-up modals.
- **Promotional Banner Scheduling:** Ensured global banner promotions render reliably and strictly respect start/end date expiration rules.
- **Carousel Display:** Resolved text and image cropping issues on described carousels across specific screen resolutions.
